Installation Guide/ User Manual: Speed Hacker

Team: 1WPM (Jasper Yeh[PO], Joshua Shier[SM], Anisha Trivedi, Emilio Angeles)

Revision #1

Installation Instructions:

1. Download Speed_Hacker.zip from the "Builds" folder in the CMPS-115-Speed-Hacker

    Github repository.

    (https://github.com/jasperyeh/CMPS-115-Speed-Hacker/tree/master/Builds)

2. Extract Speed_Hacker folder into destination of your choice.

3. Open Speed_Hacker.exe to run the game.

    Note: Speed_Hacker.exe must be in the same location as Speed_Hacker_Data and UnityPlayer.dll

Playing the Game:

1. Click on "Play" to start the game.

2. Choose an algorithm to type out.

3. Enter your name (up to 8 characters).

4. Type the given code as quickly as possible to find out your average words per minute.

5. To pause the game at any point, press "Esc" key.
